“A brilliant and revolutionary way of learning”

— Alan, teacher at Saltford CofE Primary School

Rebuilding children’s confidence in maths
and English in school and at home

How Doodle works

1

Access in school or at home

Pupils can access Doodle from a phone, tablet, laptop or desktop. It can be used offline and automatically synchronises between devices, ensuring learning is always up to date.

2

Complete a baseline assessment

Learners complete a short set of exercises to help Doodle build them a personalised work programme and give teachers an in-depth insight into their level of understanding.

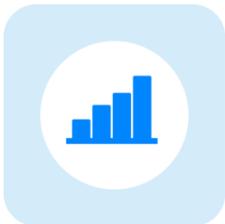

3

Use for 10 minutes a day

Doodle automatically targets each child's learning gaps and consolidates their knowledge, ensuring progression through the curriculum and removing the need for setting differentiated work.

4

Track progress

View work completed over time and instantly export data from an intuitive online hub. Use baseline assessments once a term to benchmark progress and track the % of EoY objectives pupils have covered.

5

See improved confidence and ability

Our careful balance of challenge and reward helps each child to develop a growth mindset and build a love of learning. You'll see a boost in confidence and ability in as little as six weeks!

"The impact of daily Doodle time is evident in school. Some children have made **12 months of progress in just 8 months!** Children have a personalised learning programme linked to their individual needs and areas for development. They're able to **take responsibility for their own learning** and work."

— Emma, Deputy Head Teacher at Silver Tree Primary School

DoodleSpell

Covers the grammar, punctuation, spelling and comprehension curriculum for KS1 and KS2

Jonathan Coy
@Headteacherchat

"Doodle helps to **build attainment, confidence and a love of learning**. It's a highly engaging software that makes sure learning is 'just right' for each child. This makes it so much more efficient than creating or running your own individualised learning programme"

— Review from founder of HeadTeacher Chat, Jonathan Coy

All subscriptions include the support of a dedicated School Success Advisor, full teacher training and online support for parents.

Prices start at just £6 per pupil per year.

"The impact of the investment in DoodleMaths on **engagement and progress** in maths has been significant. This resource has enabled pupils to access **personalised** and engaging maths work from home and in school and has enabled teachers to monitor progress and identify the gaps in learning. It has also **significantly reduced** teacher time spent on planning, differentiation, preparation and assessment."

— Julie, teacher at Addington School
