

# DoodleMaths Classroom Display

This noticeboard display material is designed to celebrate your school's Top Doodlers.

The PDF document consists of 25 A4 pieces of paper so you can print it easily.

## Instructions for use:

1. Open PDF
2. Print Document.

Or you can print features of the display to create a custom board suited to your classroom. We have included an 'Elements' folder within the 'DoodleMaths Classroom Display' folder with all the individual graphics of the display, in case you wanted to use specific graphics from the main display (an example is shown on the right). We've also included our very own Doodle border (not picture in the image) to make your display really stand out!
