

Go beyond instant recall with DoodleTables

Bring multiplications to life with **DoodleTables**, the interactive times tables app for KS1 and KS2!

Designed to be used 'little and often', DoodleTables explores the relationships between numbers and how to present them in a range of contexts, helping pupils to truly master their multiplications.

- Aligned to the national curriculum for KS1 and KS2
- Accessible on phones, tablets, laptops and desktops
- Audio dictation available for all questions
- Included as part of a DoodleMaths subscription

How can DoodleTables benefit my school?

Ensures academic progression

Rather than simply testing pupils, DoodleTables is filled with **thousands of interactive exercises** that combine visual and audio elements, scaffolding each child's learning and building a solid foundation of understanding.

Prepares pupils for the Multiplication Tables Check

Unlike other programmes, DoodleTables doesn't just cover key curriculum criteria. It also **builds positive learning skills** by exploring multiplications in a fun, approachable way, breaking down any anxieties children may have about the test.

Supports teachers

DoodleTables **automatically marks each child's work** and displays their results in an online dashboard, removing the need for tests and making it easy to offer additional support where needed.

"We no longer have to set and mark homework. [Doodle] helps teachers to see gaps in children's learning and offers ways to support and encourage them to continue to progress."

— Emma, Year 3 and 4 teacher,
Northway Community Primary School
